Main Questions/Topics	Additional Questions
What is your role in your department/research area?	Student/in, Researcher, PI, Leitungsfunktion etc.
What are the problems/research questions that you currently work on?	Research areas, research interests
Research Data: What kinds of data do you typically work with?	What counts as „data"? What kinds of data do you produce? How are they produced (methods, theories)? Kinds of data, amount of data, data origin, How are data archived? Are there repositories for data in your discipline? Who runs them?
Who owns the data?	Researchers? Departments? Research groups? University? Research communities?
Are there any guidelines on how to treat research data?	Responsibilities; Who produces data? Who manages data (if anyone)? Who has access to data and how? Has this changed over time?
How are data managed?	Data management & curation; Is there a centralized data management? Is everybody doing their own thing?
Dissemination: What happens to results? How are they typically disseminated?	Publications, Repositories, Archives, etc. – which are common, where are they etc.

Where do you see the biggest problems in your research area (with respect to RDM)?	Are there aspects of data management which could be improved (regardless of how)?
Concluding remarks
